excellens inc.

### Company History and Profile

*Hayco Family Holdings Incorporated: A Legacy of Innovation and Diversification*

With roots dating back to 1979, Hayco Family Holdings Incorporated has been a dynamic force in various industries for over half a century. Originally established as an engineering outfit and cereal processor, the company has evolved into a diverse business group with a presence in multiple sectors.

Today, Hayco's portfolio spans a vibrant array of industries, including real estate development and management, events pavilions, fertilizers, food and feed ingredient manufacturing and trading. This continuous evolution and expansion reflect the company's commitment to innovation, quality, and excellence across all its ventures.

#### **Mission:**

To provide exceptional value to our customers by delivering high-quality goods and services. We are committed to fostering an environment where everyone experiences our core values of financial prudence, integrity, grit, harmony, and, above all, unwavering loyalty and respect for our customers, shareholders, and employees.

#### **Vision:**

To be a trusted leader in our industry, known for our commitment to quality, integrity, and the continuous growth of our customers, partners, and employees.

## PROCESS FLOW

## PRODUCT APPLICATION

### MEATS

Hotdogs and sausages, meat loaf, hamburger patties, meatballs, ham, corned beef, bacon, luncheon meat, chicken nuggets

*Benefits:* Binder, enhance texture, sliceability, mouthfeel, retain water during and after processing, prevents separation of meat particles, stabilises freeze-thaw cycling, better shelf life, higher profit margin due to yield increase

### CHEESE AND DAIRY

Cheese, yogurt, cream, desserts, condensed milk, evaporated milk, flavored milk

*Benefits:* Adds Viscosity, Suspends particles and prevents separation, Stabilizes texture with change of temperature

### CANNED/POUCH PET FOOD

*Benefits:* Maintains uniform suspension, eases demolding from the can, ensures consistent moisture, binds meat particles effectively, adds richness to the gravy, reduces syneresis, and prevents fat separation during processing

### DESSERTS, JELLY, PUDDING

*Benefits:* Ideal for stabilizing dessert jellies and minimizes syneresis. It ensures stability at room temperature and offers a texture range from soft to elastic to rigid gels.

### ICECREAM

*Benefits:* Acts as a stabilizer to enhance creaminess and melting resistance, product. Manages ice crystal formation, ensuring a smoother texture. Ensures a homogeneous meltdown and prevents milk casein precipitation. Contributes to a velvety texture and a creamy mouthfeel.

### SAUCES

*Benefits:* Used in sauces to enhance texture, stabilize consistency, and control viscosity. It improves mouthfeel, reduced syneresis, Serves as a vegan-friendly alternative.
